Subject: Portland Oregon Superfund clean up of the Willamette River

I would like to comment on the draft plan to clean up the Willamette River. I think the proposed plan is inadequate as it leaves much of the river contaminated for generations to come. Portland Audubon suggests at least 1000 acres of polluted sediment be removed and I agree. The cleanup should focus on the having the lower Willamette clean enough to remove the fish consumption advisory in 10 years. Creating a dredged toxic waste dump will not meet these goals and this dredged material must be removed appropriately from the river. The polluters that are responsible for this pollution need to be held accountable and pay for this appropriate level of cleanup of our river.

Thanks
